

Color Profiling Without Limitations.

Continuing to revolutionize the market as the leader in color profiling solutions, X-Rite Pantone is proud to announce the i1Pro 3 Plus.

Designed for imaging, print, and textile professionals who need consistency with calibration and profiling capabilities, the i1Pro 3 Plus provides the ability to quickly and efficiently create color profiles on a wide variety of substrates. Resulting in the highest level of color accuracy in the industry.

With the growth of customization and efficient production, digital printing is now mainstream. Imaging professionals need to calibrate and profile to optimize file creation and print accuracy to stand out in the market. With the ability to measure larger print materials with optional polarization, the i1Pro 3 Plus can reduce color variability on many substrates, including vinyl, fabrics, transparent films, specialty photo papers, corrugated, and back-lit, for the highest level of color accuracy and repeatability. The optional polarization feature reduces reflections in shadows and highlights, yielding more pleasing color reproduction.

Materially Diverse.

- Enables profiling of a broad range of material substrates and surfaces with a new larger aperture of 8mm:
 - **Industrial materials:** corrugated, glass, metal, wood, and vinyl
 - **Packaging and Printing:** thin films, labels, cardboard, and plastics
 - **Textiles:** organic, synthetic, weaves, and sublimation sheets
 - **Ceramics:** ceramic tiles and laminates
 - **Photo:** fine art, high gloss, canvas, and lacquered papers
 - **Monitors and Displays:** up to 5000 nits of brightness
- Reduces color measurement variability with optional polarization capabilities, helping to correct for unique material qualities
 - Polarization can reduce specular reflections, providing “better blacks” and richer colors on unique surfaces making measurements for profiles more accurate
- Supports emission scanning for backlit film and materials used in signage and other applications

Automation and Calibration: Simplified.

- Achieves correct calibration and creates ICC profiles with the addition of new targets and standards, resulting in a reduction of waste and an increased ROI
- When combined with i1iO, the i1Pro 3 Plus optimizes automated file creation allowing for a reduction of wasted time and materials during production
- Delivers accurate measurements of larger print materials, substrates, and surfaces
- Simultaneously measures M0, M1, and M2 in a single pass to account for optical brighteners
- Offers a new LED illuminant, improving device reliability and provides four measurement conditions

Service Support and Warranty

X-Rite's color analysis and measurement solutions are engineered and manufactured to the most rigorous quality standards. These standards are backed by comprehensive global service, superior phone and web support, and preventative maintenance options to optimize your long-term investment. We have developed service support and warranty plans that are unique to your organization's specific products and needs. Learn more by reviewing our service offerings on our website at: www.xrite.com/page/service-warranty. Still unsure of what you need? Contact us directly at: servicesupport@xrite.com
